

FleetCam®

See what the driver sees.

Watch your drivers in real-time, automatically capture clips of aggressive driving, and download historical video - all from the comfort of your office.

Live Streaming

Check in on your drivers and the road around them with flawless live streaming from multiple cameras at once.

Event-Based Notifications

When events like unsafe driving or driver fatigue are detected, FleetCam® saves a clip from all camera angles for review and driver coaching.

Stream Video History

All videos can be accessed remotely so you can stream and download to your computer without having to physically access the vehicle.

Breadcrumb Trail Snapshots

Helpful video snapshots are captured every 5 minutes and displayed along the vehicle's route, helping you choose the moments you want to stream.

FleetCam® Essential

Up to 2 Cameras • Windshield Mounted

FleetCam® Essential gives you everything you need to start recording and analyzing video of your drivers and the road ahead.

HD Resolution

High resolution recordings and infrared sensors for night vision.

Configurable

- Weatherproof exterior cameras available.
- Trigger events based on digital inputs.
- Delayed shutdown for recording after a vehicle is turned off.

FleetCam® Enterprise

Up to 6 Cameras • Redundant Storage + Everything in Essential

FleetCam® Enterprise is the video monitoring solution from the future. Get a 360° view of your vehicles with up to 6 cameras. Available options include dual-storage for redundant recordings and an LCD screen for the driver.

HD & SD Videos

All videos are stored in standard and high-definition so you can save time by quickly downloading SD videos when HD isn't necessary.

LCD Screen for Drivers

All cameras installed on the vehicle can be viewed live by the driver with an optional LCD screen. Great for backup cams.

Redundant Recordings

Videos can be automatically backed up onto dual storages.

FleetCam® AI

Only available with FleetCam® Enterprise

Add artificial intelligence to FleetCam® Enterprise to detect drivers falling asleep, smoking, and more. Drivers are alerted in real-time with audio and visual feedback. Video of each incident is automatically saved for later review.

Real-time Driver Coaching

In-cabin feedback is like driver coaching in real-time. FleetCam® helps avoid serious accidents by alerting drivers when they're distracted, dozing off, following a vehicle too closely, and more.

AI-Detected Events:

- Driver Falling Asleep
- Driver Distracted
- Driver Using Cell Phone
- Unsafe Lane Departure
- Driver Smoking
- Driving too Close
